ANNOUNCEMENT:

The low income individual subsidy programme in the income category (R0-R3500 pm), has been terminated in KZN, after due deliberation and the conclusion that the programme was open widespread abuse and fraud. In addition, it was concluded that the programme did not actively grow the secondary market as formerly subsidized houses were being resold, often within the same family unit, effectively double subsidizing a single house and family. Persons in the income category of R0-R3500 will therefore be assisted via our numerous other subsidy instruments available on projects. The individual subsidy was only one such alternative.
